

Women in Muslim Countries (WIMC)

Survey research has a role to play in providing Muslim women with a public voice where custom and culture do not permit them their own. To this end, D3 sponsors The Women in Muslim Countries (WIMC) Survey. This multi-country, multi-wave study is designed to measure women's empowerment in actual daily practice, providing a deep look into the oft-perceived gap between current public policy and empowerment initiatives and actual practice on the personal and local level.

Background on WIMC Project

From 2007 to 2013, WIMC collected data on the 25 countries listed below. Countries are continuously added. Most countries have national stratified random samples to capture the attitudes and behaviors of the female population as a whole.

Future of WIMC Project

For over 25 years D3 has conducted public opinion, media, monitoring & evaluation and consumer surveys in over 120 countries worldwide.

D3's core competencies are research to support public diplomacy, international aid and development programs and broadcast media audience measurement in emerging markets and conflict/post-conflict environments. Our approach involves building permanent partnerships, at times including equity participation in new or existing firms and building indigenous expertise and capabilities through resource and knowledge transfer.

D3 Systems continues to enrich the WIMC project by collecting data from across the world.

Themes in the survey include, but are not limited to:

- Women's Status & Rights
- Household Dynamics
- Outlook for the Future
- Self-Perception of Rights and Status
- Health Care
- Court Systems
- Access to Media and Resources
- Political Participation & Efficacy
